

## *Laila Ali's Baby Gets a Dream Nursery*

**July 10, 2011- (Orange, CA)**- Combining elements of function, safety and beauty, Little Crown Interiors is proud to announce the completion of a custom nursery for Sydney, the infant daughter of Laila Ali and Curtis Conway. This highly-sought after interior design company brought all their knowledge of the perfect nursery layout to the project, incorporating special furniture and personal touches to create the room Laila dreamed of for her baby.

First among the exceptional items that make up the nursery is the “Hope” Crib. Aptly made in a gorgeous shade of pink, this stunning, bench-crafted crib is the combined effort of Little Crown Interiors and Southern California based luxury furniture maker, Newport Cottages. As proceeds from the sale of every “Hope” Crib go to Breast Cancer Research, the piece serves as a symbol of the courage and compassion for which Laila Ali is known, and hopes to share with baby Sydney. Each “Hope” Crib comes with a custom plaque for the owners to inscribe a sentiment of their choosing; on Sydney’s, the inscription reads, “Unconditionally Loved and Eternally Blessed.” To further promote this cause, Newport Cottages also supplied the changing table and a custom toy box, painted to match the room in pink, white, and green.

Also featured in this nursery design is a breathtaking custom artwork piece, created by the skilled team at Art.com. Above the “Hope” Crib, hangs a large photo of Muhammad Ali holding his infant daughter Laila, stretched onto canvas- a very personal element, and a key focal point in the room. Additionally, keeping the spiritual nature of Laila’s beliefs in mind, Little Crown Interiors wanted to include angels in the room’s artwork. Two prints of cherubs, also provided by Art.com, compliment the one-of-a-kind wall decals created by Dali Decals, specifically for this project. Amongst the other customized and well thought-out elements in Sydney’s nursery stands the custom glider by SPI Baby. Chosen by Little Crown Interiors with the help of Laila and the brilliant design team behind SPI baby, the beautiful glider stands as a testament to the desire to create not only a beautiful room, but one that is also full of meaning and promise. The time spent in this chair will be priceless to the family, and the opportunity given to the brand new, L.A. based, U.S. made furniture of SPI Baby serves as a launching pad for the fledgling business.

Little Crown Interiors – the creative design duo of Naomi Alon and Gerri Panebianco - is SoCal’s “go-to” interior design firm for elite nurseries and children’s rooms. With over 60 gorgeous projects under their designer belts, Naomi and Gerri have captured the imagination of parents and press alike, thanks to Naomi’s innovative, color-fabulous and ultra-efficient (ninja-like!) design skills combined with Gerri’s instinctive approach to each new Mom’s needs.
